Working with the spiritual energy of the ancestors will allow participants to explore concepts, fears, spiritual beliefs, and confusion around the process of death and dying. Within this work there is an incredible gift made available in healing your soul of its deep-seated wound. Heal the unresolved traumas on an ancestral level so they will not show up in your life or in future generations. As the healing takes place in the ancestor field, as you heal the soul wound, or family soul, you heal seven generations past and seven yet to come. This healing releases you and allows for healing and fulfillment to manifest in your life.

"When we understand the systemic laws that allow love to unfold, we may help suffering families and individuals to find healing, even after a lifetime of hate, anger and abuse."

~ Bert Hellinger ~
